

Candidate Portal

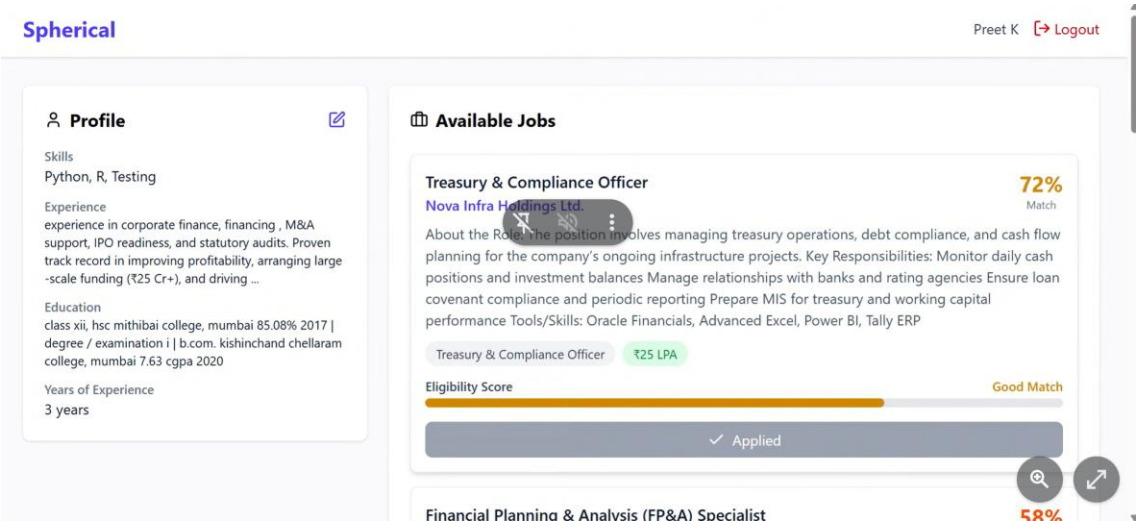

1. Even after clicking apply, status doesn't change to "applied", but if you click again, the pop up for the same comes up, even then status doesn't change for a while, sometimes even after 10 minutes have passed

On this page, when resume is uploaded, it is ambiguous at the first attempt that the system is calculating, and it looks like the person is a low match for everything, Make it more

prominent that it is in calculating phase, rather than showing a red line. Display its calculating more prominently such that is visible

Skills, experience, and education **incorrectly parsed** – is it an OCR fault or post AI processing fault?

This is what the resume displays -

Core Skill(s): Financial Planning & Analysis | Fund Management | Cost Optimization | Budgeting & MIS | Advanced Excel | Statutory Audit | Financial Modelling

Pursuing currently	Certified Financial Planner, Python for Finance, Financial Modelling
--------------------	--

Disclaimer to be added in large font: AI generated information on the profile, AI may make mistakes, needs to be rechecked

Question –

Profile OCR is either incorrect and inaccurate or incomplete

How is the processing working – flow – is it OCR>Brings data to profile>make edits>send to gemini for processing>then matches with the profile data?

Or

OCR>bring data to profile>sends the extended version of the OCR data of the resume to Gemini in addition to profile data post edits>then matches with profile data

Another OCR API Failure – 2/3 inaccurate

Management Accountant – Manufacturing Sector
WestPort Engineering Ltd.

About the Role: The candidate will be responsible for plant accounting, cost tracking, budgeting, and assisting with internal audits. The role demands familiarity with production-level financial management and ERP systems. Key Responsibilities: Prepare cost sheets and variance reports Assist in budgeting and forecasting for production units Ensure accuracy of inventory valuation and fixed asset registers Support in monthly financial closings and MIS reporting Tools & Skills: SAP FICO, MS Excel, Cost Accounting Standards Why It Fits Bhavin: Limited match — his audit experience touches manufacturing (BPCL, NGOs) but not cost or management accounting. ERP exposure (SAP) helps slightly, but lacks hands-on costing work.
